## **DETAILED ACTION**

#### Election/Restrictions

1. Applicant's election without traverse of group I, claims 1-25 drawn to a method of forming a semiconductor device is acknowledged.

## Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitation of selectively removing the device isolation layer exposed by the first space as recited in claim 1c and claim 12e must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

#### Specification

3. The disclosure is objected to because of the following informalities: page 2, line 9 the "Words" appears to be a typographical error. Appropriate correction is required.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

#### Claim Objections

4. Claims 1 and 12 are objected to because of the following informalities: the use of the phrase "to remain" and "to concurrently remain" as recited in claim 1, line 21 and claim 12, line 40 respectively appears to be grammatically incorrect. Appropriate correction is required.

#### Claim Rejections - 35 USC § 112

- 5. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 6. Claims 1 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The scope of claims 1 and 12 is unclear because of the limitation of selectively removing the device isolation layer exposed by the first space as recited in claim 1c and claim 12e respectively. For example cell device isolation layer (39b) appears to be

Art Unit: 2811

formed next to the first space S1. And it is not clear how one is able to remove the cell device isolation layer 39b via the first space S1.

Claims 2-11 and 13-25 are also rejected as being dependent on rejected independent claims.

#### Allowable Subject Matter

7. Claims 1-25 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

#### Reason for allowance

8. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest, singularly or in combination at least the limitation of "forming spacers on sidewalls of the second space and on sidewalls of the second gate pattern as well as a spacer layer pattern filling the first space; ... removing said spacers to expose the sidewalls of the second space and the second gate pattern and to remain a recessed spacer layer pattern in the first space" as recited in claim 1 is a major difference between the prior art and the claimed process and the second major difference between the prior art and the claimed process is "forming spacer layer patterns filling the first spaces as well as spacers covering sidewalls of the second spaces and also sidewalls of the peripheral circuit gate electrode;... removing the spacers to expose the sidewalls of the second spaces and the sidewall of the peripheral circuit gate electrode and to concurrently remain recessed spacer layer patterns in the first spaces" as recited in claim 12.

Art Unit: 2811

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References A-D are cited as being related to a method of forming a semiconductor memory device.
